# Welcome

Sirius Oil Field Support Services Limited is an indigenous energy service company registered in Nigeria with the Corporate Affairs Commission and also a member of Sirius Group Nigeria; one of the fastest growing energy groups in Africa.

---

Sirius Oilfield is a Nigeria company in partnership with Norscot exploration and production to provide specialized field support solutions for the Upstream Energy Sector in areas of Exploration and Production, integrated Drilling services which involves Field Development including Testing, Valuation, Drilling and Simulation.

We also offer technical and engineering support services for other Sub-Sectors of the Hydrocarbon Industry. We provide complete field operations for production, routine maintenance checks, facility upgrade and service support.

Our clients include Energy Companies majorly involved in Exploration and Production. Sirius Oil Field Support Services is set to operate the Sirius Energy Oil Field Block (Grein Block) in Niger Republic covering 22,020 km, while in Equitorial Guinea, exploration and oil field arrangement are in place with G.E. Petrol.

At Sirius Oil Field Support Services Limited, we work towards being one of the Leading Oil and Gas services and resource support companies in Africa with efficient, pro-active and innovative solutions.

## Vision:

To become one of the leading providers of world class service offerings and solutions in the upstream energy sector in Africa

## Mission Statements:

-  Provide quality and safety assurance
-  Offer efficient services
-  Constantly improve on service delivery
-  Offer innovative support

## Executive Summary

---

Sirius Oil field Support Services is a member of Sirius Group, one of Africa's fastest growing energy companies with business activities in Exploration and Production, Mining, Power, Oil and Gas Technology and Construction.

We are driven by the ambition to provide superlative products and services that exceed client expectations in our operations. Our strategy is based on cost effective solutions and risk management business models that help in the delivery of efficient and high quality services.

We welcome you to a world of result and value propositions coupled with the dexterity and professionalism needed in today's challenging business environment. At Sirius Group, we leverage on the synergies that exist in our integrated platform in order to provide our clients with world class service offerings. This is who we are!

Furthermore, to support our operations, and in cognizance of new emerging frontier basins in Africa and the Caspian Sea, we are pro-actively positioning our business and presence with strategic alliance alongside international and local players in some countries of this region to take advantage of;

-  Potential business opportunities
-  Expand services
-  Improve on technical expertise

## Operational Excellence

---

While we are aware of the local and intricate demands of various client; we seek to provide dynamic solutions that do not contravene industry best Practices. We ensure that our services meet up to international standards. This is vital for all operations.

We also know that domestic activities of host communities and their lively hood need be considered in all areas of operations especially.

To this end, we consider the different variables and plausible scenarios when dealing with such, with concern for Health, Safety and Environment issues in all our activities.

With a continuous drive for improvements supported by proactive engineering solutions, good business practices and high reporting standards. Service tools for integrating operations on a daily and quarterly basis is structured to allow real time assessment with an interactive based management system.

Sirius intends to break new grounds with innovative and cutting-edge technology, experienced and highly skilled work force and is committed to the development of Local Content.

# Offering

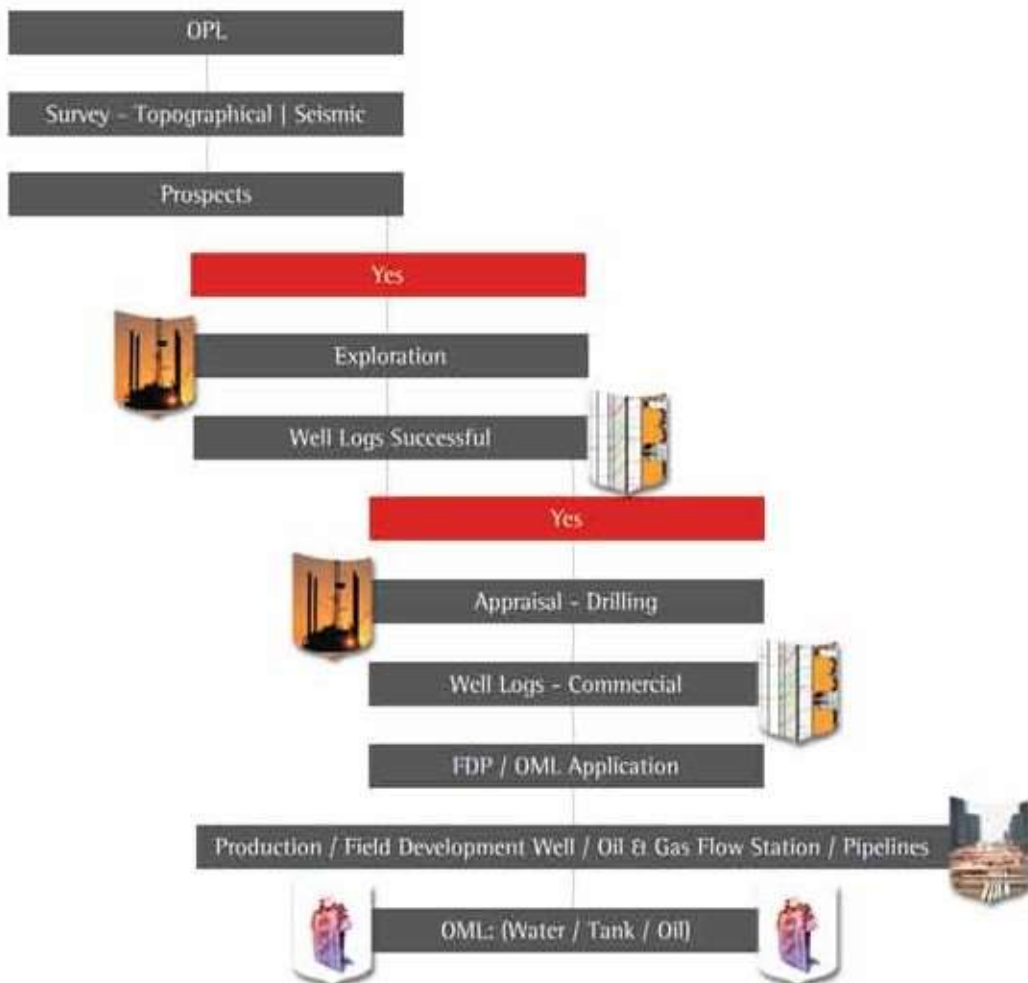

---

-  Gas solution
-  Field Development
-  Well services
-  Logistics base operation
-  Project Management

## Operations

## Service Stations

When a well is completed and put online, marginal increase in value is obtained by flow optimization while production is managed more efficiently. Flow optimization techniques improve output and reduce aging wells.

Although, declines in production due to liquid loading, well-bore designs or decreasing bottom-hole pressure can hinder capacity utilizations, we proffer innovative solutions to ensure performance. Our dynamic services and job focus helps ensure that our clients get the best from their return on investments.

-  Corporate Social Responsibility
-  Local Content

## QHSE

---

Quality control and risk management are some of the essential ways to minimize the potential hazards of field operations. Safety is essential for any company in all areas of operations and for us at Sirius, it is top Priority.

Needless to say that some adverse effects of environmental degradation and dangers to health are bi-results of the activities of energy companies in a bid to actively deliver on the ever increasing demand for energy supply.

We devote time and resource every year to ensure that we help in ecological remediation. Our dedication to the preservation of nature and public campaign support for Safety is a core tradition enshrined in our corporate identity.

We ensure routine checks, maintenance, supervision adherence and training while working assiduously to always abide by set local and international 'QHSE' standards in all business and operational activities.
